

E-Z Flush®

A NEW ANGLE TO
SENSOR FLUSH VALVES.

Accepted and proven within the plumbing industry as the number one retrofit kit and sensor flush valve, the Zurn E-Z Flush has taken on a new look. E-Z's new look with enhanced upgraded features now offers the utmost in sensor operation and user detection while maximizing fixture performance and restroom sanitation.

- E-Z's new angled face allows for user detection even with the toilet seat in the raised position.
- E-Z's sensor lens has increased impact strength to protect against vandalism.
- A switchable automatic 24 hour optional flush
- A 3 second detection delay eliminates false flushes due to user movement.
- Battery life has been increased to 3+ years.

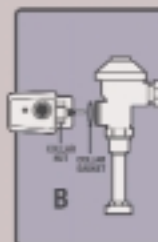

Look no further. These features along with the dependability of E-Z Flush make Zurn your first choice for sensor flush valves and retrofit kits.

QUICKEST INSTALLATION ... A THREE-MINUTE RETROFIT.

A Shut off water supply at stop. Loosen collar nut. Remove handle from flush valve.

B Place collar gasket into collar nut and attach the E-Z Flush unit where the handle was removed.

C Tighten collar nut with supplied collar wrench and install batteries.
