

Water Saving

Environmental and Financial Conservation Begins with Zurn

Today's building owners and facilities managers face increasing cost challenges, one of which is reducing water consumption. Zurn provides innovative water solutions to reduce operating costs and conserve water.

Zurn Commercial Brass Products and China Fixtures are engineered with water saving features and low maintenance costs. Zurn has the complete package of products from our waterless urinals to our water saving line of flush valves, faucets, sensor products, and low flush china fixtures.

Our technical support staff can assist with identification of LEED/Green approved products and provide support data for the building certification process.
