**ZURN ELKAY WATER SOLUTIONS IS
THE RECOGNIZED LEADER IN PROVIDING
HIGH-QUALITY, INNOVATIVE PRODUCTS
WITHIN THE PLUMBING INDUSTRY.**

The products throughout this brochure feature our newest technologies, creating significant differentiation from the competition, and provide labor-saving advantages on projects to increase contractor profitability.

ZURN® ROOF DRAINS

Optimized designs enhanced with the latest technology is why Zurn roof drains outperform the competition. They're engineered to meet code and are so effective that they can reduce the total number of roof drains needed. Find the widest range of roof drains in the industry for traditional, siphonic and specialty applications right here.

THE CONTRACTOR ADVANTAGE

BEST-IN-CLASS FLOW PERFORMANCE

The FloForce® parabolic body design and additional enhancements are engineered to evacuate water from the roof more efficiently.

SIPHONIC SYSTEMS

Engineered siphonic systems can provide material savings and lower total installation costs. Available in 2"-4" outlet sizes.

BI-FUNCTIONAL

Combined primary and overflow drainage system eliminates half of the penetrations through the roof to save time in assembly, waterproofing and piping. Available in 2"-8" outlet sizes.

6NH DATA SUMMARY

ROOF DRAINS

Zurn offers the greatest variety of roof drains to fit any application. For varying insulation depths, our drain with adjustable riser will simplify installation. A deck plate add-on can also reduce installation time without needing an underdeck clamp. Ideal for flat roofs, siphonic roof drains prevent air from entering the downpipes for faster draining. Here are some of our top drains and options.

ZURN FLOOR DRAINS

Contractors can save up to 14 minutes per installation with our BZ1/EZ1/SZ1 technology. Our versatile product offering provides cast iron and PVC assembly options with round or square tops, available in nickel bronze or stainless steel in a variety of sizes.

THE CONTRACTOR ADVANTAGE

ADJUSTABILITY

Industry-leading, post-pour adjustability allows you to raise, lower, or tilt-correct a drain from the elevation of the concrete pour.

JOBSITE PROTECTION

3,000-lb.-rated construction cover and protective label eliminate the need for makeshift duct tape over the strainer, providing a hassle-free, finished installation.

PREFAB FRIENDLY

Patented stabilizers facilitate a prefab opportunity and help secure drains in place prior to the pour, preventing accidental movement and minimizing potential rework.

THE CONTRACTOR ADVANTAGE

Using a Zurn Z1035 stabilizer plate can save up to

30 min
per drain installation

ZURN TRENCH DRAIN SYSTEMS

Eliminate jobsite complications with the easiest trench drains to install, built to your requirements. We have a trench drain for every application.

THE CONTRACTOR ADVANTAGE

SPEEDY INSTALLATION

Longer, lightweight lengths, fewer joints and durable material make trench drains easier to handle and minimize jobsite damage — no heavy lifting or extra hands needed.

DESIGN FLEXIBILITY

We provide the widest variety of material choices, sizes, and loading capabilities for ultimate flexibility in design.

AT YOUR SERVICE

Zurn engineering provides layout drawings and design assistance for any application.

ZURN PHIX ACID NEUTRALIZATION

Neutralize acid at point of use more safely and effectively using our PHIX cartridge. Its compact design fits conveniently under the sink within any application, new or retrofit, taking the place of traditional acid waste systems, such as limestone.

THE CONTRACTOR ADVANTAGE

LOW MAINTENANCE AND COST

Reduced labor and maintenance keep costs down compared to traditional acid neutralization systems.

LESS SPACE, FEWER PARTS

Compact design fits conveniently under the sink, even in tight configurations.

RELIABLE, LONG LASTING

10-year warranty and NSF international standards adherence ensure lasting performance.

ZURN INTERCEPTORS

Zurn Green Turtle interceptors come in ranging capacities and feature corrosion-resistant construction. We offer custom configurations for differing applications, such as above-ground installs, double systems, parking garages, zero lot line conditions, etc.

THE CONTRACTOR ADVANTAGE

A COMPLETE SOLUTION

Our FOG, solids, and oil interceptors offer the widest range of product in the industry.

SOLUTIONS FOR EVERY PROJECT

Customizable configurations help meet your project specifications.

SAVES TIME AND RESOURCES

Simple installation reduces total installation cost and eliminates the need for callbacks.

ZURN WILKINS WATER CONTROL AND BACKFLOW PREVENTERS

The Zurn Wilkins time-tested portfolio of backflow preventers, automatic control valves, pressure reducing valves, thermostatic mixing valves, strainers and more can reduce time and costs associated with installation, maintenance and repairs. Save your clients money with quality products that don't sacrifice the bottom line.

THE CONTRACTOR ADVANTAGE

PROVEN RELIABILITY

Innovative product solutions minimize repairs and extend the life of the product.

EASY MAINTENANCE

Most wear items have quick, swap-out designs for easier, cost-effective maintenance and lowest total cost-of-valve ownership.

FULL COMPLIANCE

Time-tested products exceed industry compliance standards, which gives clients peace of mind.

Universal repair kits and easy maintenance can
save 75%
on labor and repair kit costs over the lifecycle of the product

BACKFLOW PREVENTION ASSEMBLIES

Zurn Wilkins backflow prevention assemblies are specially configured to protect against backsiphonage and backpressure. Valves are designed for use in low- or high-hazard applications — you can find every level of protection with Zurn Wilkins backflow preventers.

Small Backflow Preventers

The 900XL3 series of backflow preventers are easier to install and repair with a short lay length and modular checks, featuring top access for faster valve repairs — under 15 minutes. Available in 1/2"-2".

The 300XL series of backflow preventers feature a high-strength, engineered polymer composite body with modular checks for safe and easy line flushing, quick winterization, and simple maintenance. Available in 1/2"-2".

ZURN WILKINS PRESSURE REDUCING VALVES

Get the highest flow rates and reliable performance from the Zurn 500XL3 pressure reducing valve. No other direct-acting pressure reducing valve handles such high flow rates for industrial water lines and commercial systems. With the flattest flow curve on the market today from the patented venturi technology, this valve leads in performance.

THE CONTRACTOR ADVANTAGE

HIGHEST FLOW RATES OF ANY PRV

500XL3 has a low loss of pressure at common operating flow rates, making it an acceptable substitute for small ACVs in many applications.

DROP-IN INSTALLATION

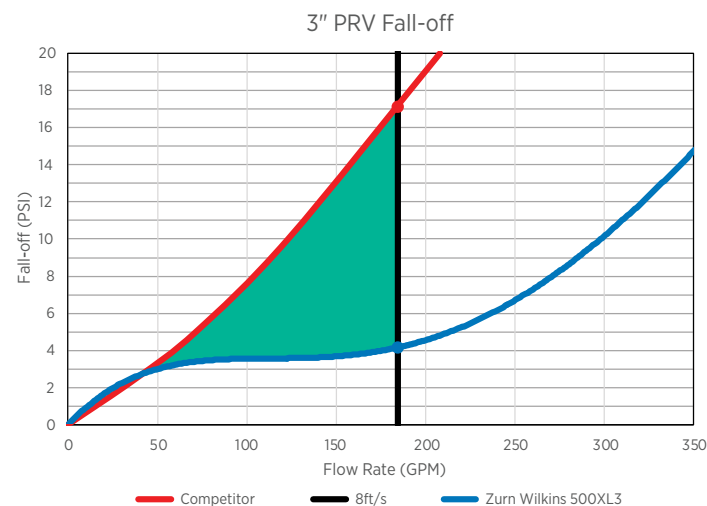

Short lay length and compact design fits most applications and simplifies installation.

DURABILITY CUSTOMERS APPRECIATE

All-bronze body and bell construction provide enduring strength, while the stainless steel stem and composite cartridge internals resist corrosion to extend the valve's lifespan.

FLAT-OUT BEST IN FLOW 500XL3 has a 13 PSI pressure advantage

Learn more about this lightest valve on the market

PRESSURE REDUCING VALVES

Safely reduce high inlet pressure to lower outlet pressure with Zurn Wilkins pressure reducing valves, available in 1/2"-4" sizes with multiple end connection options for commercial, industrial and residential applications. Lowering outlet pressure can drastically decrease water consumption, lowering water bills.

BOTTLE FILLING STATIONS AND WATER DISPENSERS

Specifying filtered drinking water upgrades is more efficient with our readily available products and retrofit options that simplify installation. There are in-wall, on-wall, and floor-standing options, and our ezH2O Liv® Pro water dispenser installs within 16" OC 2" X 4" studs. All filtered drinking solutions include a filter that is tested and certified to NSF/ANSI 42 and 53. All our bottle filling station and water dispensers minimize single-use, disposable plastic bottle waste to help your clients meet sustainability goals.

THE CONTRACTOR ADVANTAGE

RELIABLE

Our award-winning ezH2O bottle filling stations are built to last, many in vandal-resistant designs.

HELP WITH INSTALLATION

An extensive library of installation videos and real-time technical support are available as needed.

ezH2O OUTDOOR BOTTLE FILLING STATIONS AND DRINKING FOUNTAINS

Outdoor tubular bottle filling stations can be installed directly outside, against a wall or in the ground — no electricity required because they are non-filtered and non-refrigerated.

FILTRATION

Elkay drinking solutions work best with Elkay WaterSentry® filters, which are tested and certified to NSF/ANSI 42 and 53 to reduce lead and other contaminants. For renovation projects, add filtration to existing non-filtered units with our retrofit filtration kit.

51600C

*WaterSentry 6,000-gallon Filter
high-capacity compatible
with enhanced units only*

ELKAY COMMERCIAL SINKS

For over 100 years, the Elkay brand has been synonymous with commercial-grade stainless steel sinks, made in the USA. Keep in mind that Elkay can provide custom-built sink solutions in addition to catalogued products to meet special application requirements.

THE CONTRACTOR ADVANTAGE

DURABLE, LONG-LASTING MATERIAL

Our commercial sinks are made of strong, Type 304 stainless steel in a range of gauges for thickness.

REPAIRABLE FINISH

Many of our Lustertone Classic® sinks, a top choice for classrooms, feature a forgiving finish that stands up to everyday use.

SHIPS IN ONE BOX

All components are included in one box, including installation parts and drains and accessories, if applicable.

EWMA4820C

*Stainless Steel 48" x 20" x 8" Wall Hung
Multiple Station Hand Wash Sink Kit
(includes two LK940GN05T4H faucets
and one LK18B drain)*

Discover sinks by application type

LUSTERTONE CLASSIC SINKS WITH PERFECT DRAIN®

Our Perfect Drain is a specific drain that can be added to many of our sink models, but some sinks automatically come with them.

ELUH1814PD
*Lustertone Classic Undermount Sink
With Perfect Drain
(20-1/2" x 16-1/2" x 7-7/8")*

ELUH2115PD
*Lustertone Classic Undermount Sink
With Perfect Drain
(23-1/2" x 18-1/4" x 7-1/2")*

THE CONTRACTOR ADVANTAGE

CONVENIENT PACKAGING

Lustertone Classic sinks equipped with Perfect Drain come with convenient packaging; all drain parts are included with the sink.

FAST INSTALLATION

Perfect Drains have a hygienic, seamless integral connection and are available on a variety of Elkay sinks. They're unique and compatible with garbage disposals for faster installation.

FLEXIBILITY

This special line of sinks can be installed with or without the curved edge showing, depending on your client's design preference.

ZURN PEX CROSS-LINKED POLYETHYLENE

Zurn PEX is manufactured with a patented resin material and cross-linking process, which allows contractors to install using either the cold expansion or crimp and insert process. Our PEX maintains superior chlorine and UV resistance ratings as defined by ASTM standards.

THE CONTRACTOR ADVANTAGE

FULL LINE CAPABILITY

System allows you to use one pipe for both crimp and expansion systems for a variety of plumbing applications. Zurn provides the most comprehensive offering of PEX product from 3/8" to 2".

SUPERIOR PERFORMANCE

Zurn PEX pipe and system lead the industry with the highest chlorine and UV resistance, highest burst pressure rating, and tensile strength.

INDUSTRY-LEADING WARRANTY

25-year warranty backs your work and delivers sound mind for the building owner.

PEX TUBING, FITTINGS AND TOOLS

34-20XLEPEX

Use other great Zurn products, such as the 20XL pressure reducing valve with integral expansion PEX barbs

PEX Expansion Toolheads

Available in 1/2", 3/4", 1", 1-1/4", 1-1/2" and 2" diameters

QPPM12H QickPort® Manifold

Preassembled, works with optimized port configurations

Crimp Tools

Other accessories, including crimping tools, pipe cutters, pipe dispensers and more also available

Straight Length PEX Pipes

Available in 3/8"-1" in red and blue and 1/2"-2" in white

Coil PEX Pipes

Available in 1/4"-2" in white and 3/8"-1" in red and blue

Zurn PEX is
23% stronger
than PEXa tubing

Zurn PEX is developed using a newer method than PEXa — our own formulation of the silane method, which creates a denser, stronger, more resilient pipe. It is a little stiffer than some pipe options because it is stronger.

ZURN ELKAY SMART PRODUCTS

Whether it's avoiding major repairs, detecting a leak, or scheduling maintenance when it's needed, our smart connected products turn questions into actions and data into strategies. The products wirelessly monitor usage trends, water consumption and possible issues customizable to any building type. Building owners gain a better sense into their plumbing systems for a smarter operation.

THE CONTRACTOR ADVANTAGE

PREDICT AND PREVENT

Real-time insights give you the ability to predict when maintenance is needed and prevent costly downtime.

STRENGTHENED RELATIONSHIPS

Our plumbSMART portal offers 24/7 access to product information and trends.

SECURE DATA

Fully encrypted data uses a wireless network to keep data secure.
