

ZURN COMMERCIAL FIXTURES OWNER'S GUIDE

HOW TO CARE FOR AND CLEAN ZURN VITREOUS CHINA FIXTURES

Toilet Bowls and Tanks - Urinals - Lavatories - Service Sinks

Zurn's Vitreous China products are finished with a glaze that is nonporous, acid-resistant, and scratch resistant for the ultimate in sanitation. The glossy luster will last for years without discoloring, fading, or staining if the proper cleaning methods described below are followed.

China Surface Areas

A general everyday cleansing of Zurn's Vitreous China products using a mild, antibacterial liquid dishwashing soap and warm water is recommended to maintain maximum fixture performance and appearance while minimizing overall cleaning time and maintenance involved in keeping a sanitary environment.

For difficult to remove stains, use a small amount of AJAX® or Comet® Cleanser with warm water and scrub clean with a soft cloth. Always rinse thoroughly with water and dry the fixture.

To remove lime build-up or other mineral deposits, KRC-7® liquid cleanser may be used. Read and follow all label directions. Rinse thoroughly with water and dry fixture.

Tank and Bowl

WARNING! USE OF ANY IN-TANK TOILET BOWL CLEANSERS VOIDS THE WARRANTY FOR ZURN TOILETS. In-tank cleaners can damage the rubber, metal and/or plastic components of the tank assembly causing leaks and can impede toilet performance. Apply toilet cleansers to the toilet bowl only.

To clean the bowl, use TOILET BOWL CLEANSERS THAT ARE APPLIED DIRECTLY TO THE TOILET BOWL and a nylon brush when needed. Using a metal brush will create metal marks in the bowl. To remove metal barks, we recommend a household cleanser which contains oxalic acid, such as Barkeeper's Friend® or Zud® and a nylon brush.

Toilet Seat

Several of the newer household bathroom cleansers have a damaging affect on seat materials. Use a mild, antibacterial soap and warm water to keep your toilet seat sanitary and looking brand new. Rinse thoroughly with water and dry seat off. Do not use cleansers containing silica or sand, as they will be abrasive and may scratch the seat.

Tank Handle and Metallic Surfaces

Use a non-abrasive bathroom cleanser to clean these surfaces. Rinse clean with water and dry with soft cloth.
