

Programmable Dual Sensing Digital Thermostat – QH511

Specification Sheet

Tag _____

Dimensional Data: Inches and [mm] are subject to manufacturing tolerances and change without notice.

Engineering Specification: Zurn 24VAC Programmable, Dual Sensing, Digital Thermostat. A one stage, heat-only, 2 wire thermostat. Thermostat senses ambient air temperature and/or slab temperature. Has settable minimum and maximum slab temperature feature. Thermostat has a 7-day or 24 hour programmable schedule with a 2- or 4- temperature per day setting. Maintains program settings after power outages and has a 4-hour clock back-up without a battery. Has a 24VAC, 2 amp internal relay. Includes a 10K ohm slab sensor. CSA, C and US listed. Meets ICBS and FCC regulations for EMI/RFI.

Accessories

- ___ **QHMZ4A** 4-Zone Expandable Zone Valve Control
- ___ **QHMZ6A** 6-Zone Expandable Zone Valve Control
- ___ **QHMZ1P** Single Zone Pump Relay Control
- ___ **QHMZ4P** 4-Zone Expandable Pump Relay Control
- ___ **QHMZ6P** 6-Zone Expandable Pump Relay Control
