

Smarter Together: Every Drop Counts

CONNECTED PRODUCTS. WHERE PERFORMANCE AND PURPOSE ALIGN.

Designed to turn real-time product data into actionable insights, with plumbSMART customers can:

- **Remote Control:** Schedule and manage line flushing without site visits
- **Water Safety:** Ensure clean water delivery while tracking usage and reduce waste
- **Live Updates:** Get real-time alerts and performance data
- **Smart Insights:** Use analytics to guide decisions
- **Prevent Issues:** Predict maintenance needs before they become problems

HOW IT WORKS

BOTTLE FILLING STATIONS

SMART RESTROOM
(FAUCETS, FLUSH VALVES,
OCCUPANCY LIGHTS)

SMARTPRO GREASE
INTERCEPTORS

WILKINS (BACKFLOW
PREVENTERS, FLOOD
CONTROL SYSTEMS,
PRESSURE MONITORS)

CONNECTION GATEWAYS

SMART AND SUSTAINABLE. SIMPLIFIED.

By monitoring bottles saved, filter status, water usage and scheduling routine flushes, building operators can reduce their total cost of ownership. System-wide visibility makes it easy to stay ahead of maintenance and plan for timely filter replacements.

Connected Products

Zurn Elkay connected products wirelessly connect to the plumbSMART online portal so you can anticipate problems before they start.

BOTTLE FILLING STATIONS notify when filters need replacing and track bottles saved, supporting timely upkeep and sustainability reporting.

SMART RESTROOMS (FAUCETS, FLUSH VALVES, OCCUPANCY LIGHTS) allow for tracking daily activations, water use, indicate stall occupancy and maintenance needs like battery changes. Remote line flushing ensures cleaner, safer water, while usage data helps validate sustainability and detect potential issues.

SMARTPRO GREASE INTERCEPTORS let teams remotely check grease levels, reducing risk and protecting water systems without the guesswork or rigid schedules.

WILKINS (BACKFLOW PREVENTERS, FLOOD CONTROL SYSTEMS, PRESSURE MONITORS) measure pressure readings, relief valve data and discharge levels, and trigger automatic shutoffs to help prevent flooding.

CONNECTION GATEWAYS conveniently tracks and transmits data from Connected Products securely to plumbSMART® via the internet similar to Wi-Fi modems.

LZS8WSBPRO

Elkay Pro Filtration Single Bottle Filling Station

1100000026

Connected Retrofit Kit with Endpoint Board for Pro Filtration Bottle Filling Stations

LZS8WSAP-W1

Enhanced Filtered Connected Bottle Filling Station & Single ADA Cooler Arctic White

ZG6955-W2

Zurn 0.5 GPM 4 in. Base Series Smart Connected Sensor Faucet W/Gear-driven Ceramic Cartridge, Hydropower

ZG6920-W2

Zurn 0.5 GPM AquaSense 5-3/8 in. Gooseneck Smart Connected Sensor Faucet with Gear-driven Ceramic Cartridge, Hydropower

ZER6000AV-W2

AquaVantage® ZER Series Connected, Exposed Sensor Battery Water Closet Flush Valve in Chrome

ZERK-W2

E-Z Flush® Connected, Sensor Battery Retrofit Kit with chrome-plated metal cover

Midnight Black Arctic White Standard Gray
