A Clean Slate: Hygienic Public Restroom Design with WELL

Program #: ZE-WD001

Credits: AIA 1.0 LU/HSW, ASPE 1.0 CEU/PDH*, 0.1 IDCEC

Learning Objectives:

1. Identify emerging trends in public restroom design and how multi-stall restrooms address users' concerns of privacy and hygiene.
2. Evaluate partition materials and types to ensure public restroom stalls are designed to be safe, sustainable, and accessible for all users.
3. Illustrate how touchless restroom fixtures promote sanitation and water efficiency.
4. Demonstrate how warm air hand dryers equipped with HEPA filters can encourage proper hand hygiene and sustainability

HSW: Yes **PDH:** Yes*

Description:

Now more than ever, public restrooms must be clean and comfortable for all users. However, exactly what that looks like has been up for debate. Join us in this one-hour course as we make the case for multi-stall public restrooms that address users' concerns of privacy and hygiene through partitions, fixtures, hand dryers, and beyond. Participants will learn how to design new and existing restrooms that help projects fulfill WELL Building Standard v.2 requirements by promoting public health and safety.

* This course is approved for PDH credit but is subject to compliance with each states rules and guidelines.
