

Achieving Style & Substance with the Newest Plumbing Innovations

Program #: ZURN 02-23

Credits: AIA 1.0 LU/HSW, ASPE 1.0 CEU/PDH*

Learning Objectives:

1. Recognize handwashing and drying products that improve hygiene, simplify cleaning and maintenance, conserve water and energy, and are ADA compliant.
2. Specify toilets, urinals, and flush valves that are sanitary, conserve water without reducing flush power, and are easy to use by all members of the population.
3. Explore trench, floor, and roof drain options for their ability to prevent clogging and hazardous accumulation of water and debris and to provide a safe and comfortable walking surface that is durable for the expected type of traffic.
4. Evaluate plumbing product options that provide consumers the functionality and efficiency they expect while enhancing the design and aesthetics of a space.

HSW: Yes **PDH:** Yes*

Description:

Today's consumers demand much of plumbing products, expecting them to be durable, environmentally friendly, safe, ADA compliant, and easy to install, clean, maintain, and use. This course reviews the options and features of an array of restroom plumbing products and drains, examining how they not only meet functional and performance requirements but also how they add style and character to a design.

* This course is approved for PDH credit but is subject to compliance with each states rules and guidelines.
