

Let Performance Be Your Guide

Zurn's high performing technology delivers reliable, sustainable, smart solutions for a longer lifespan, and delivers savings to building owners and maintenance teams.

EZ Gear Technology – No Solenoid

- Gear-driven ceramic cartridge outperforms solenoids.
- Consistent performance throughout the lifespan of the valve.
- When combined with hydropower, provides lowest total cost of ownership and maintenance.

Heavy-Duty Ceramic Disc Cartridge

- Withstands elevated temperatures for effective thermal disinfection.
- Less susceptible to debris and buildup for superior leak prevention.
- Ceramic disc operation eliminates compression seals and streamlines water path.

GO BLUE® Diaphragms, Gaskets and Seals

- Unique thermoplastic elastomer (TPE) construction **lasts 8-10 times longer** than comparable black rubber material.
- Superior resistance to chemicals such as chloramine, chlorine and other harsh chemicals.
- Reduces run-ons/leaks and inconsistent flush volumes that necessitate costly double flushing.

Hydro-X® Sustainable Power

- Water flowing through the fixture generates and stores renewable hydropower, designed to last the life of a commercial restroom.
- High efficiency design optimizes performance at flow volumes down to 0.35 gpm and up to 1.5 gpm and above.
- Simplified installation saves time and upfront costs over hardwiring.

Upgrade to Zurn — deliver reliability, precision and efficiency for the life of your restroom.

Water closet and urinal flush valve repair parts and complete kits are available to extend your restroom's performance. Our components are also compatible with most competitor models.

- Clog-Resistant Diaphragm
- Diaphragm Disc
- No Leak Handle O-Ring
- Handle Seal
- Handle Washer
- Tailpiece O-Ring
- Stop Valve Seal
- Stop Valve O-Ring
- Vacuum Breaker
- Spud Gasket
- Spud Washer
