Zurn Fire Protection Solutions
Smarter Solutions, Wider Selection
We're Solving Smarter

At Zurn, we aren’t just a product and service provider, we’re problem solvers – continuously focused on water control, safety and conservation. From our drain systems and interceptors to our finish plumbing, piping systems, and of course, our full line of fire protection solutions, we are known throughout the industry as a reliable leader.

“Zurn meets our expectations with its selection, level of quality, and timely delivery. I was able to find the valve configurations to complete my system. I appreciate the positive shutoff of the OS&Y gate valves. Not to mention, I didn’t have to wait a week to get material.”

Full Line. Full Compliance.

It’s nice to have selection. It’s even better if you can find it all through one manufacturer.

From backflow to every valve in between, complete your system with our Fire Protection Solutions. Our products work together and always meets compliance, so you’ll gain peace of mind, yet save some time.

**Backflow Preventers**

Enhance the service life of your fire protection system and avoid cross-contamination to your potable water supply by installing one of our patented backflow preventers.

**Fire Valves**

Hose or floor control, field adjustable or factory set, globe or angle body configurations, grooved or threaded connections, our fire valves install how you need them to without a hitch. They are a reliable choice with more options, reliable performance and the lowest lifecycle costs.

**Automatic Control Valves**

Fire systems can be complex with multiple controls for ranging functionality. Automatic control valves provide steady downstream pressure, allowing high flow rates without risk.

**Shut-Off Valves**

Whether it’s a simple repair or an emergency, turn off the source quickly without affecting your system. Our shut-off valves feature low torque actuation that’s easy to maneuver time and again without fail.

**Pressure Relief Valves**

Take some pressure off of your system – these guys are built to handle it. Our pressure relief valves automatically curb buildup whenever the line exceeds the desired setting.

**Stainless Steel Wilkins Building Riser (WBR)**

When it comes to getting to the source, we’ve got you covered. With all stainless steel construction and intuitive installation, you can connect your building to the outside water supply line with fewer joints and without concern.
Backflow Preventers

Zurn is recognized as the market leader in backflow products delivering innovative solutions with the lowest cost of ownership.

Double Check Assemblies (DC)
