

Make the Change to Lead-Free Early

All fittings or fixtures installed before January 4, 2014 are exempt from the requirements contained within the Reduction of Lead in Drinking Water Act.

So why make the change now?

In preparation of the nationwide change, Zurn has already begun the transition to lead-free material.

We are transitioning in advance of the deadline mandated by pending legislation because we are interested in minimizing the risk for all parties who will be affected by this change.

By making the change early, we hope to set an example and encourage fellow manufacturers, engineers, contractors, building owners, and water purveyors to do the same.

At Zurn, protecting public health and water purveyors is our number-one priority.

Wilkins Water Control Products	Commercial Brass Fixtures
Automatic Control Valves*	4" Centerset Faucets

Subject to change based on Federal EPA interpretation

Lead-Free 2014

Why Lead-Free?

The Reduction of Lead in Drinking Water Act

What Products are Affected?

Call 855-ONE-ZURN

to speak to a Customer Care Representative or contact your local Zurn Sales Representative.

zurn.com

Why Lead-Free?

Studies have shown that by reducing lead in the nation's drinking water systems, the U.S. could save up to \$53.1 million in health care costs annually. Children and senior citizens are particularly at risk when exposed to lead in drinking water.

As a leader in lead-free applications and global awareness of lead-related health issues, Zurn is dedicated to offering the highest-quality and safest products available.

Act now to begin the conversion process in your business!

Distribution Plan

Zurn has already begun lead-free conversion, with an estimated completion by **February 2013**. After this date, standard products will no longer be produced, but may be available from our inventory. Due to the change in the Safe Drinking Water Act, standard products will no longer be compliant.

Zurn will not accept standard product returns after February 1, 2013. Check with your Zurn Sales Representative or go to www.zurn.com for more details.

Engineers

Update your spec now! Projects in the design phase will potentially be impacted by the legislation. Contact your Zurn sales representative to schedule a meeting to review your specifications and to create a conversion plan that makes sense for both your business and your clients.

Distributors

Convert your inventory now! Your risk can be measured in a few areas:

- 1. Product availability – in the short and long term**
- 2. Lack of awareness of the lead-free law requirements**

Inform your contractors and your local Authority Having Jurisdiction about the law and your conversion plans.

Contractors

Convert now! Ensure your current and future projects are lead-free law compliant to mitigate your liability. Contact your Zurn sales representative for more information.
