

Is your water safe?

Lead-Free Hydrants

On January 4, 2014 the Federal Reduction of Lead in Drinking Water Act required that any valve, fitting, or fixture coming in contact with potable water must be considered lead free. Zurn recognizes that locations such as amusement parks, marinas, campgrounds, schools, and playgrounds commonly contain hydrants used for potable water. Zurn's lead free hydrant offering provides a safe reliable solution that exceeds federal requirements.

Features and Benefits

Water Safety

- Safeguard users against toxic lead contamination with lead-free hydrants
- Ceramic hydrants with integral backflow preventer protects potable water from back siphonage
- Complies with the Federal Reduction of Lead in Drinking Water Act for peace of mind

Labor Savings

- Round body design of patented -EZ hydrants allow core-drilling to eliminate costly rework to damaged walls
- Use Z1320XL-EZ with hydrant box designed to fit one modular brick space for a time saving installation

Broad Offering

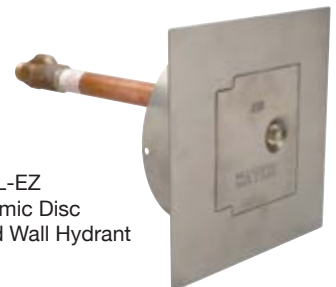

- Available half-turn ceramic disc cartridge that lasts longer, reduces maintenance, and eliminates leaks
- Choose moderate climate or non-freeze hydrants to meet your site needs
- Largest lead-free hydrant offering for wall, roof, ground, and yard applications
