

300 Series Tester Edition Backflow Preventers

Faster Testing, Maintenance, and Repair
With the 300 Series Small Backflow Saves
Time and Money

The EZSwap™ Pressure Vessel is removed and replaced in seconds, significantly reducing down-time and saving up to 35 minutes in repair and re-build time, improving your customers' satisfaction.

Safe and Easy Line Flushing, Installation, and Testing

- EZSwap is quickly removed and replaced with Flush Fitting Tool for simple line flushing to remove fouling debris, avoiding unnecessary maintenance
- Line flushing is simple, safe, and easily directed to a safe drain
- Easy flushing saves up to **15 minutes** per unit
- Z-Press™ and Z-Bite™ solderless connections simplify and speed installation
- Fast-test test cocks speed testing set-up

Simple Maintenance and Repair

- Avoid the hassle and cost of a second repair appointment — keep a spare EZSwap on hand to increase the number of clients serviced in a day
- With a spare, tested EZSwap on hand, maintenance and repairs can be performed off-line in the safety of your vehicle or shop, and can be reused

3/4" 375XL Tester Edition

Lead-Free Reduced Pressure
Principle Assembly with
Fast-Test Test Cocks

1" 350XL Tester Edition

Lead-Free Double Check
Valve Assembly with
Fast-Test Test Cocks

“The 300 Series with EZSwap Pressure Vessel saves me time and money. My customers love it because the water system is down for less than 5 minutes and we don't have to schedule a second appointment for repairs.”

BEN BENNETT
Backflow Prevention Specialists, Inc

Durability and Theft Deterrence

- UV-resistant, reinforced nylon EZSwap resists corrosion and mineral build-up to better withstand harsh conditions
- Optional black fusion epoxy coating camouflages bronze, virtually eliminating theft

Lowest Life-Cycle Costs

- Reduced labor and repair kit costs yield savings of **75%** or more over the backflow life-cycle in comparison to other manufacturers

300 Series Tester Edition Backflow Preventers with Fast-Test Test Cocks

300 Series EZSwap™ Process

1-1/2" 375XL shown

1
Valve is installed in-line. Turn shut-off valves to shut down system.

2
Unscrew and remove wedge, or un-bolt.

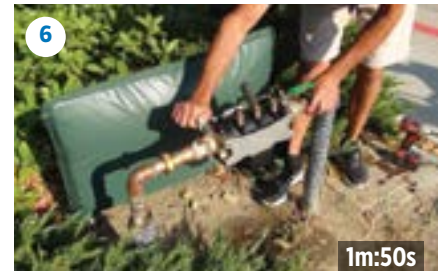

3
Remove EZSwap Pressure Vessel from backflow.

4
Drop in replacement EZSwap Pressure Vessel.

5
Reinstall or replace EZSwap Pressure Vessel and wedge.

6
Commission the backflow and start up system.
