

Z-Bite™ and Z-Press™ Solderless Connections

NR3XLPF, with Z-Bite Solderless Connections

Quick and easy installation of Zurn Wilkins backflow, pressure reducing valves, and thermostatic mixing valves with Z-Bite and Z-Press fittings.

375XLPR, with Z-Press Solderless Connections

Labor Saving

- Repair and replacement jobs completed in less time, with fewer tools, resulting in more up-time of your customer's water system

Ideal for Repair or Retrofit Applications

- Torch-free sealing method provides safer installation, eliminating fire hazard and protecting surrounding materials and finishes
- Solderless connections can be installed without fully draining water from a piping system, speeding installation and repairs

Z-Bite Solderless Connections

Z-Bite Push Fittings

- Quick tool-free and solderless connection – simply insert tubing into fitting for a leak-free connection without the need for solder, flux, torch, or other hazardous chemicals
- Z-Bite Tailpiece Kits or Integral connections can be used with copper, PEX, or CPVC from 1/2" - 1"
- Fittings are removable, allowing products to be easily replaced

Z-Press Solderless Connections

Z-Press Press Fittings

- Works with commonly available press-fit tools to create a permanent crimp
- Z-Press options include Tailpiece Kits or Integral connections for 1/2" - 2" copper tubing

Z-Bite™ and Z-Press™ Solderless Connections
