Leveling Drains and Cleanouts

Effortless Adjustment AFTER the Pour!

Labor Savings
- Virtually eliminates labor resulting from improperly set drains
- Offers effortless leveling and height adjustment after the concrete pour
- Eliminates complications with loose leveling shims

Innovative
- New patent-pending design improves sanitation through minimized pooling
- Allows 360° of quick and easy adjustment

Quality
- Meets ASME A112.6.3 and A112.36.2M standards
- Durable all-metal construction prolongs the life of the drain

Adjustment
- Remove strainer and loosen locking screws
- Adjust height and level
- Retighten locking screws
- Secure strainer

Discover how easy it is to reduce installation time, avoid costly rework, and ensure high quality installations with innovative solutions by Zurn. These exclusive features, combined with over 100 years of performance engineered products, create the most comprehensive plumbing package available.

**Debris Cover**
Prevents debris from entering and clogging the line during the pour, while keeping the strainer clean and intact.

**Z415 Drain Body**
Creates long-lasting quality installations, with configurations for nearly every application.

**Adjustable Leveling Strainer**
Allows height and level adjustment AFTER the pour!

**Neo-Loc Drain Gasket with Integral Test Cap**
Enables the contractor to set the drain and prepare the line for pressure testing in one step, without additional test balls.

**Patent Pending Stabilizer System**
Provides the opportunity to pre-assemble the drain to a known rough-in height away from the job. Plate-type stabilizer systems create an open pocket on the underside of the plate allowing the waste line piping to be attached after the pour. Every Zurn stabilizer system improves the installation by keeping the drain-set rigid and level throughout the pour, saving valuable time and labor costs.

**Z400-SR**
Designed for use in slab-on-grade construction, securing the drain to the pipe.

**Z1035**
Engineered for use in fly-form construction, structural decking and wooden sub-floor applications.

**Z1035-Q**
Ideal for Q-deck applications with varied ridge widths and structural decking.
