

From this . . . *to this!*

In four easy steps ...

1

2

3

4

- 1 Remove handle cap and Optima Plus*.
- 2 Insert Zurn AquaVantage® internals and plastic internal cap.
- 3 Place chrome outer cap on valve.
- 4 Attach Zurn E-Z Flush® kit.

The Change-Out Kit includes the brass cap, internal plastic cap, the appropriate AquaVantage repair kit, and either a Zurn sensor E-Z Flush or a manual handle assembly. You can make your choice from the available Change-Out Kits on the reverse side of this flyer.

Zurn E-Z Flush® sensor retrofit kits are making a name for themselves as being the easiest retrofit kits to install and the most reliable to operate. Unlike top mounted units that rely on solenoid operation and are subject to waterborne hazards such as debris and chemicals, the E-Z Flush motor operator is outside the water pathway unaffected by these elements. The Zurn ORK Change-Out Kits can help you transform troublesome top mounted sensor units into reliable E-Z Flush retrofits.

Give yourself a break. You can do it the hard way or make it E-Z with Zurn.

E-Z Flush® Change-Out Kits

To change out a Sloan G2* Optima Plus* or Optima Plus* battery sensor flush valve to a Zurn E-Z Flush battery-operated sensor flush valve with chemical clog resistant diaphragm kit.
