Zurn Wilkins Automatic Control Valves

Lowest total cost of ownership

Features and Benefits

• Valve design simplifies maintenance and repair
  - Isolation valves allow for service and maintenance without shutting down the system
  - Union connections simplify pilotry repairs
  - Wye strainer can be cleaned in-line without system shutdown
  - Hex on main valve stem allows for use of standard tools

• Standard valve features enhance total cost of ownership
  - Pressure gauges allow for constant system monitoring
  - Epoxy coating lengthens the service life of the valve
  - Stainless steel hardware resists corrosion over time
  - Low maintenance with readily available repair kits

• 48-hour lead time speeds delivery, maximizes uptime*

• Equivalent lay length to leading manufacturers for ease of retrofit

Available Body Types

ZW209
with “SH” option
- stainless braided hose

ZW205FPA
with “SP” option
- stainless steel pilotry

Standard Globe
Reduced Port
Angle
1-1/4” - 16” available

*Large quantities and special configurations may require longer lead time.
### ZW200 Series Overview

- **O-ring stem seals for ease of repair**
- **Hex on stainless steel stem simplifies maintenance**
- **Stainless steel fasteners with washers**
- **O-ring stem seals for ease of repair**
- **Wye strainer comes standard, allowing quick and simple debris removal**
- **Isolation valves and pressure gauges come standard for commissioning and service**
- **Stainless steel pilotry for enhanced corrosion resistance**
- **Top and bottom guided diaphragm assembly for even sealing and repeatability**
- **Fully coated lip centers cover during maintenance reassembly**
- **Union connections simplify pilotry repairs**

### Options

- **Identical lay length with leading manufacturers for retrofit opportunities**
- **Simplified stainless steel piping for ease of maintenance**
