

Case Study

REEBOK HEADQUARTERS

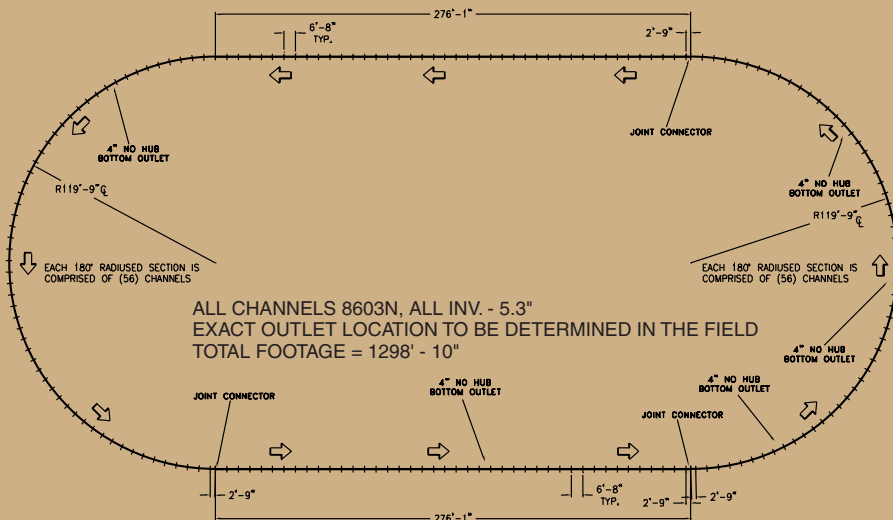

CANTON, MASSACHUSETTS

Reebok World Headquarters in Canton, Massachusetts proudly displays 1,300 feet of Zurn Z886-ST 6" wide Perma-Track sport track around the perimeter of their fantastic new building. This custom project was sold by Joseph Feeley of Field Construction Services of Hopkinton, Massachusetts, and the P. J. O'Donnell Company.

Cape & Island Construction of Pocasset was able to easily install the track due to the lightweight 80" modular sections with our quick-connect overlaps and integral rebar clips. Longer sections and fewer joints also help in providing a fast and consistently straight installation. Labor reduction is also provided on the job site due to our pre-sloped and pre-radiused channels. Perma-Track's smooth, non-porous interiors provide superior flow capabilities, as well as substantial cost savings.

Zurn Industries is a leader in innovative structural composite channel drain systems, with office and warehouse facilities in Falconer, New York.
