

ZURN® *Bishop Dwenger High School*

Bishop Dwenger High School, Fort Wayne, Indiana

Who does a large high school in Fort Wayne turn to when they have a grease problem and other grease recovery devices have failed? ZURN!

The new Zurn Z1192 Grease Recovery Appliance is the next step in the evolution of grease interception. The Z1192 offers a complete grease recovery system which is PDI performance tested. It incorporates a flow regulating device; a solids interceptor with disposable bags; an automatic temperature control to prevent grease cake buildup; a dependable and quiet sensor controlled grease drawoff system; and no-leak, odor-free, easy-to-use disposable grease collection bags to make grease control clean and easy.

When you are ready for a quiet, odor-free, no-mess, easy-to-use grease recovery appliance ... turn to the Zurn Z1192.

Features include:

- State-of-the-art patent pending sensor technology
- Passive interceptor back-up fail safe
- No-leak, no-odor, no fuss grease containment bag
- Disposable solid interceptor bags
- Durable type 304 stainless steel construction
- 104 years of Zurn engineering, manufacturing and marketing expertise

If you prefer old mechanical technology with noisy moving parts, we can't help you. But, if you are looking for a clean, easy way to collect and dispose of grease, Zurn has the answer ... the Z1192 Grease Recovery Appliance.
