

Snow Melt Thermostat – QHSMT Specification Sheet

Tag _____

Dimensional Data: Inches and [mm] are subject to manufacturing tolerances and change without notice.

Engineering Specification: Zurn Snow Melt Thermostat for controlling a snow melt system. This 24VAC thermostat has a green power indicator LED and a red 'heating on' LED. The thermostat receives a signal from a sensor (QHGS) and powers a relay. The thermostat has a field selectable switch to sense temperature or temperature and moisture. The unit has a selectable temperature setpoint. The temperature range is 32°-41°F (0°-5°C). DIN rail mountable.

Accessories

- ___ **QHGS** Ground Sensor
- ___ **QHMZ1P** Single Zone Pump Relay Control
- ___ **QHMZ4P** Four Zone Pump Relay Control
- ___ **QHMZ6P** Six Zone Pump Relay Control
