

Model 500XLFC

Water Pressure Reducing Valve with Flanged Connections

Application

Zurn Wilkins model 500XLFC is designed for installation on potable water lines to reduce high inlet pressure to a lower outlet pressure. The high flow capacity makes this device most suitable for industrial water lines and commercial water systems. The balanced piston design enables the regulator to react in a smooth and responsive manner to changes in system flow demand, while at the same time, providing protection from inlet pressure changes

SNINTING STREET

NSF/ANSI/CAN 61

Approvals

Meets the requirements of NSF/ANSI/CAN 61 and 372*

*(Less than 0.25% Weighted Average Lead Content)

Materials

Body & cover Low Lead Cast Bronze, ASTM B 806

Bell housing Cast Bronze, ASTM B 584

Stem & plunger Low Lead Cast Bronze, ASTM B 806

Internals Stainless steel, 300 Series Elastomers EPDM (FDA approved)

Buna Nitrile (FDA approved)

Polymers Delrin™

Springs Oil tempered wire, ASTM A229,

Epoxy Coated

Cap gasket Natural Vulcanized Fibre Seat Stainless steel, 300 Series

Options

(Suffixes can be combined)

☐ 510XLFC - 400 psi inlet rating, 75 psi to 125 psi spring

range, field set

☐ FSC - (2-1/2" and 3" only). With cast iron "Y" type

flanged strainer, fusion epoxy coated, inside

and out (200 psi strainer rating)

- \square SC sealed cage for use in pit or vault
- □ SW made for salt water service
 □ HR spring range is 75-125 psi. fi
- ☐ HR spring range is 75-125 psi, field set☐ HLR spring range is 10-125 psi, field set
- ☐ HTSTSC high temperature application, up to 180° F
- ☐ LPV high temperature application, up to 180° F,
 - spring range is 10-35 psi, factory set at 20 psi
- □ BP tapped and plugged for 3/4" bypass connection□ P tapped and plugged for gauge
- ☐ G tapped and plugged with gauge
- ☐ TBP valve stem features integral thermal by-pass

check valve (applies to 3" size only)"

Features

Sizes: 2", 2 1/2", 3"

Maximum working water pressure Maximum working water temperature Reduced pressure range (standard)

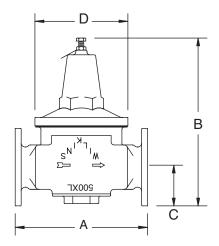

End connections (flanged)

300 psi 140° F

25 psi to 75 psi ASME B16.24 Class 150

Accessories

☐ Repair kit (rubber only)

MODEL 500XLFC 2" THRU 3" (STANDARD & METRIC)

Typical Installation

Local codes shall govern installation requirements. Unless otherwise specified, the assembly shall be mounted in accordance with the manufacturer's instructions and the latest edition of the Uniform Plumbing Code. The assembly shall be installed with sufficient side clearance for testing and maintenance. The Model 500XLFC may be installed in any position. If installed in a pit or vault, or indoor application, specify the "SC" sealed cage option. Multiple installations are recommended for wide demand variations or where the desired pressure reduction is more than 3 to 1 (i.e.: 150 psi inlet reduced to 50 psi outlet).

CAUTION: Anytime a reducing valve is adjusted, a pressure gauge must be used downstream to verify correct pressure setting. Do not bottom adjustment bolt on bell housing.

Specifications

The Pressure Reducing Valve shall be certified to NSF/ANSI/CAN 61, consist of a bronze body and bell housing with flanged connections, shall have a separate access cover for the plunger and shall have a bolt to adjust the downstream pressure. The assembly shall be of the balanced piston design and shall reduce pressure in both flow and no-flow conditions. The bronze bell housing and access cap shall be threaded to the body and shall not require the use of ferrous screws. The Pressure Reducing Valve shall be a ZURN WILKINS Model 500XLFC.
